Day 3/180 Introduction to c++

- **Print number**
  1. Two numbers are given, print their product
  2. Two numbers are given a and b, print a-b
  3. Print 6*3 in output, don't print 18, just 6*3 should be in the output screen.
  4. If we have only 4 bits, How 3 and -6 will be written in 4 bits.
  5. If we have only 5 bits, How 13 and -16 will be written in 5 bits.
